The series EC-ES-FS Weigh Cells cover the weighing range up to 7,500 g. They have been specifically designed as compact sensor components, which are suited for installation into Checkweigher. By using GMP-tailored design, all Weigh Cells are especially suitable for Wash Down applications.

The large additive dead load range favors the mounting of conveyor belts or weighing platforms without limiting the weighing range. The Weigh Cell comes standard equipped to supply final weighing values via a CAN interface as ready to connect modular components.

The integrated software filters can be configured in many ways, enabling optimal adaptation of the weighing system to the respective ambient conditions. The Weigh Cells extensive command set facilitates simplified control engineering integration. Complemented by a variety of options, the Weigh Cell can also fulfill very specific requirements.

### OPTIONS

- **Option 2:** Forceless connection of electrical aggregates
- **Option 10:** RS 422 instead of CAN interface
- **Option 11:** Bus operation
- **Option 12:** Higher display resolution (standard)

With the optional CFI (CAN-Fieldbus-Interface) it is possible to connect to a variety of industrial fieldbus systems.
